

Tanisha Chaudhary

Full-Stack Developer | Data Science Practitioner

Agra, UP (Open to Noida, Mathura, and Lucknow) | tanisha.chaudhary.ai@gmail.com | <https://www.linkedin.com/in/tanisha-chaudhary-4927a0358> | <https://github.com/tanisha-chaudhary-dev>

EDUCATION

Indian Institute of Technology (IIT), Madras

Bachelor of Science (BS) in Data Science and Applications

- **Expected Graduation:** May 2028
- **Key Coursework:** Modern Application Development (I & II), Machine Learning, Database Management, Data Structure and Algorithms, Statistics, and AI Research.

TECHNICAL SKILLS

- **Languages:** Python, JavaScript, SQL.
- **Web Development:** Flask (Backend), Vue.js (Frontend), Jinja2, SQLAlchemy (ORM), RESTful APIs.
- **Data Science:** Scikit-Learn, Pandas, NumPy, Feature Engineering.
- **Tools & Concepts:** Git, JWT Authentication, Role-Based Access Control (RBAC), Target Leakage Identification.

TECHNICAL PROJECTS

University Placement Portal

Full-Stack Project (Modern Application Development 2)

- Developed a scalable recruitment platform using **Vue.js** and **Flask**.
- Engineered a modular API architecture using a resources.py structure for efficient endpoint management.
- Implemented secure **JWT-based authentication** and **Role-Based Access Control (RBAC)**.

Hospital Management System

Coursework Project (Modern Application Development 1)

- Built a comprehensive web application for managing hospital records using the **Flask** framework.
- Utilized **Jinja2** for server-side templating and **SQLAlchemy** for Object-Relational Mapping (ORM) and database management.
- Developed core CRUD functionality for handling patient data, doctor schedules, and appointment workflows.

Taxi Fare Prediction Model

Machine Learning Project

- Built a regression model to predict fares using geospatial data and temporal feature engineering.
- Conducted rigorous data auditing to identify outliers and resolve **Target Leakage** in highly correlated features.
- Optimized performance using Scikit-Learn pipelines and numerical feature scaling.

Digital Khata

Private Financial Management Application

- Designed and built a personalized application for managing and tracking digital financial records.

Sentiment Analysis for Movie Reviews

Machine Learning Project

- Implemented a text classification pipeline using **Logistic Regression** and **Scikit-Learn**.
- Developed text vectorization and numerical scaling components for high-accuracy sentiment prediction.

EXPERIENCE

Indian Maharaja Tours

Digital Content Manager

- Manage digital marketing and professional content for a travel and wildlife tour business.
- Collaborate with the agency owner to draft technical itineraries and social media growth strategies.
